

VeriFi

A Verifiable Social Platform for Financial Claims

Your Name Advisor: Advisor Name

¹Boğaziçi University Department of Computer Engineering

What is VeriFi

A finance social media app, consisting of claims and suggested positions -

Motivation

Don't know which stock to buy? Or whether to buy gold or not in this chaotic environment? Wanna take some insights from an expert? But who? Who to trust? Posts in twitter? sketchy technical analysis in TradingView? Telegram groups for investment?

These platforms don't supply:

- social,
- verifiable,
- quantifiable

We supply all of these in **VeriFi**.

Design

Integrated with live data from APIs

Every content is signed by users.

Reputation Market Ensures:

- early foresighters are rewarded more, no copycating
- bullshit claims are prevented, claim rationally
- trivial claims are not rewarded, only interesting discussions going on

Components

Claims, Positions, Reputation Score, Reputation Market, Channels, Proofs

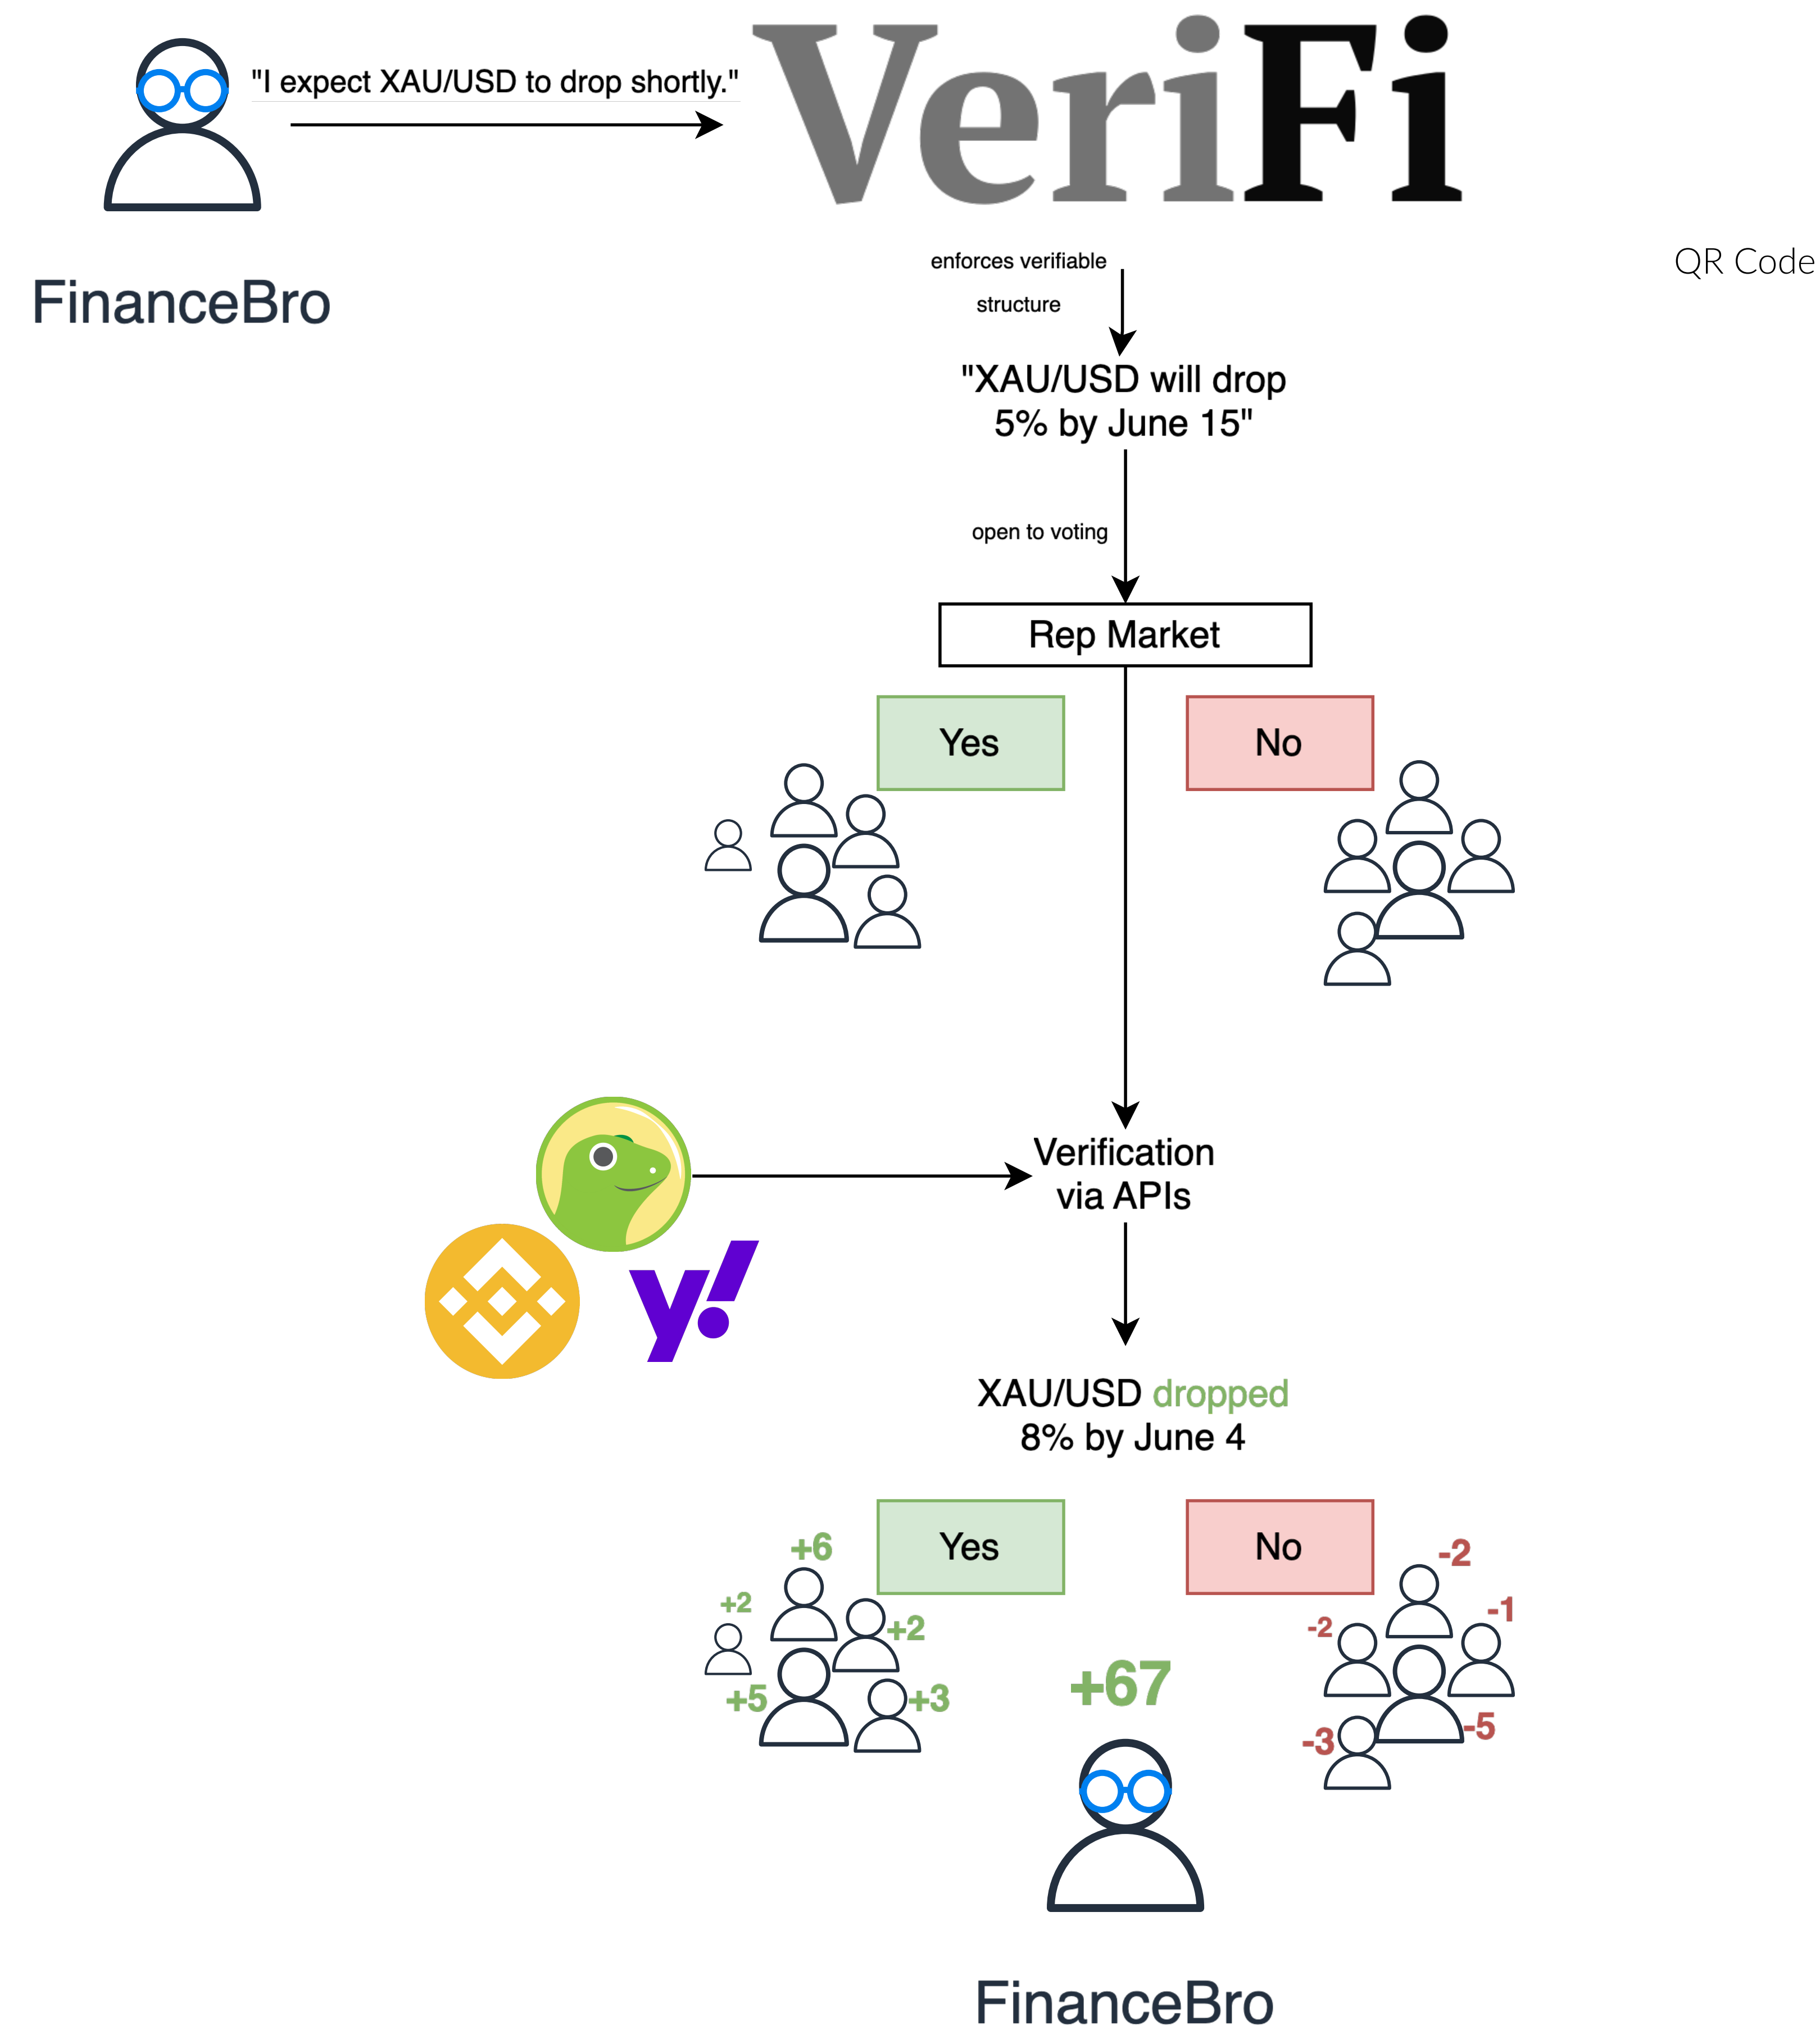

Reputation Score:

- how are scores collected?

Why Need Proofs?

- bypass gdpr
- ensure verification

Lifecycle of a Claim in VeriFi

How Reputation Market Work

What VeriFi Brings
